1. Precautions

1-1. Safety Precautions

Follow these safety, servicing and ESD precautions to prevent damage and to protect against potential hazards such as electrical shock.

1-1-1. Warnings

WARNING For continued safety, do not attempt to modify the circuit board.
Disconnect the AC power and DC power jack before servicing.

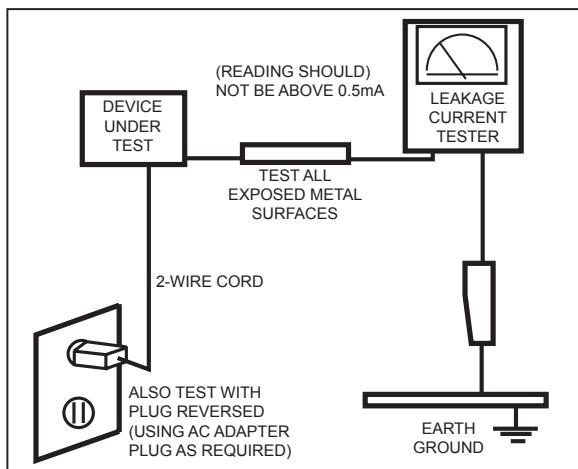

1-1-2. Servicing the LED TV

1. When servicing the LED TV, Disconnect the AC line cord from the AC outlet.
2. It is essential that service technicians have an accurate voltage meter available at all times. Check the calibration of this meter periodically.

1-1-3. Fire and Shock Hazard

Before returning the monitor to the user, perform the following safety checks:

1. Inspect each lead dress to make certain that the leads are not pinched or that hardware is not lodged between the chassis and other metal parts in the monitor.
2. Inspect all protective devices such as nonmetallic control knobs, insulating materials, cabinet backs, adjustment and compartment covers or shields, isolation resistorcapacitor networks, mechanical insulators, etc.
3. Leakage Current Hot Check:

Do not use an isolation transformer during this test.

Use a leakage current tester or a metering system that complies with American National Standards Institute (ANSI C101.1, Leakage Current for Appliances), and Underwriters Laboratories (UL Publication UL1410, 59.7).

4. With the unit completely reassembled, plug the AC line cord directly into a 120V AC outlet. With the unit's AC switch first in the ON position and then OFF, measure the current between a known earth ground (metal water pipe, conduit, etc.) and all exposed metal parts, including: metal cabinets, screwheads and control shafts. The current measured should not exceed 0.5 milliamp. Reverse the power-plug prongs in the AC outlet and repeat the test.

1-1-4. Product Safety Notices

Some electrical and mechanical parts have special safetyrelated characteristics which are often not evident from visual inspection. The protection they give may not be obtained by replacing them with components rated for higher voltage, wattage, etc. Parts that have special safety characteristics are identified by  on schematics and parts lists. A substitute replacement that does not have the same safety characteristics as the recommended replacement part might create shock, fire and/or other hazards. Product safety is under review continuously and new instructions are issued whenever appropriate.

1-2. Servicing Precautions

**WARNING**

An electrolytic capacitor installed with the wrong polarity might explode.

**CAUTION**

Before servicing units covered by this service manual, read and follow the Safety Precautions section of this manual.

**NOTE**

If unforeseen circumstances create conflict between the following servicing precautions and any of the safety precautions, always follow the safety precautions.

1-2-1. General Servicing Precautions

1. Always unplug the unit's AC power cord from the AC power source and disconnect the DC Power Jack before attempting to: (a) remove or reinstall any component or assembly, (b) disconnect PCB plugs or connectors, (c) connect a test component in parallel with an electrolytic capacitor.
2. Some components are raised above the printed circuit board for safety. An insulation tube or tape is sometimes used. The internal wiring is sometimes clamped to prevent contact with thermally hot components. Reinstall all such elements to their original position.
3. After servicing, always check that the screws, components and wiring have been correctly reinstalled. Make sure that the area around the serviced part has not been damaged.
4. Check the insulation between the blades of the AC plug and accessible conductive parts (examples: metal panels, input terminals and earphone jacks).
5. Insulation Checking Procedure: Disconnect the power cord from the AC source and turn the power switch ON. Connect an insulation resistance meter (500 V) to the blades of the AC plug. The insulation resistance between each blade of the AC plug and accessible conductive parts (see above) should be greater than 1 megohm.
6. Always connect a test instrument's ground lead to the instrument chassis ground before connecting the positive lead; always remove the instrument's ground lead last.

1-3. Static Electricity Precautions

Some semiconductor (solid state) devices can be easily damaged by static electricity. Such components are commonly called Electrostatically Sensitive Devices (ESD). Examples of typical ESD are integrated circuits and some field-effect transistors. The following techniques will reduce the incidence of component damage caused by static electricity.

1. Immediately before handling any semiconductor components or assemblies, drain the electrostatic charge from your body by touching a known earth ground. Alternatively, wear a discharging wrist-strap device. To avoid a shock hazard, be sure to remove the wrist strap before applying power to the monitor.
2. After removing an ESD-equipped assembly, place it on a conductive surface such as aluminum foil to prevent accumulation of an electrostatic charge.
3. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ESDs.
4. Use only a grounded-tip soldering iron to solder or desolder ESDs.
5. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ESDs.
6. Do not remove a replacement ESD from its protective package until you are ready to install it. Most replacement ESDs are packaged with leads that are electrically shorted together by conductive foam, aluminum foil or other conductive materials.
7. Immediately before removing the protective material from the leads of a replacement ESD, touch the protective material to the chassis or circuit assembly into which the device will be installed.

Be sure no power is applied to the chassis or circuit and observe all other safety precautions.

8. Minimize body motions when handling unpackaged replacement ESDs. Motions such as brushing clothes together, or lifting your foot from a carpeted floor can generate enough static electricity to damage an ESD.

1-4. Installation Precautions

1. For safety reasons, more than a people are required for carrying the product.
2. Keep the power cord away from any heat emitting devices, as a melted covering may cause fire or electric shock.
3. Do not place the product in areas with poor ventilation such as a bookshelf or closet. The increased internal temperature may cause fire.
4. Bend the external antenna cable when connecting it to the product. This is a measure to protect it from being exposed to moisture. Otherwise, it may cause a fire or electric shock.
5. Make sure to turn the power off and unplug the power cord from the outlet before repositioning the product. Also check the antenna cable or the external connectors if they are fully unplugged. Damage to the cord may cause fire or electric shock.
6. Keep the antenna far away from any high-voltage cables and install it firmly. Contact with the highvoltage cable or the antenna falling over may cause fire or electric shock.
7. When installing the product, leave enough space (0.4m) between the product and the wall for ventilation purposes. A rise in temperature within the product may cause fire.

2. Product Specifications

2-1. Product Information

2-1-1. Model Comparison

Model	UE**F50**

Model	UE32F40**AW			
Feature				
<ul style="list-style-type: none"> • Digital-TV, RF, 2-HDMI, 1-Component, 1-A/V, 1-USB2.0 • Brightness : 350 cd/m² • Response Time : 6 ms • CMR : 100 • Dolby Digital+, DTS Studio Sound • No Portable USB HDD Supported 				
Specifications				
Item	Description			
LCD Panel	32 inch HD 60Hz			
Scanning Frequency	Horizontal : 60 kHz ~ 73 kHz (Automatic) Vertical : 47 Hz ~ 63 Hz (Automatic)			
Display Colors	16.7M colors			
Maximum Resolution	Horizontal : 1366 Pixels Vertical : 768 Pixels			
Input Signal	Analog 0.7 Vp-p ± 5% positive at 75Ω, internally terminated			
Input Sync Signal	H/V Separate, TTL, P. or N.			
Maximum Pixel Clock Rate	74.25 MHz			
Active Display (H x V)* * Horizontal x Vertical	703.4(H) x 397.8(V) mm / 28.7(H) X 16.2(V) (inches)			
AC Power Voltage & Frequency	[EU : AC 220~240V, CIS : AC 100~240V] / AC100-260V, 50/60 Hz			
Power Consumption	56 W (Under 0.3 W, Stand by) (AC 220~240V, EU) 58 W (Under 0.3 W, Stand by) (AC 100~240V, CIS) 58 W (Under 0.3 W, Stand by) (AC 100-260V, AFRICA)			
Dimensions Set (W x H x D)* * Width x High x Depth	Set with Stand	737.9 x 487.0 x 252.6 mm / 29.1 x 19.2 x 9.9 inches		
	Set without Stand	737.9 x 435.8 x 49.5 mm / 29.1 x 17.2 x 1.9 inches		
Weight	Set with Stand	5.60 kg / 12.35 lbs		
	Set without Stand	5.20 kg / 11.46 lbs		
TV System	Tuning	Frequency Synthesize (Refer to detailed Frequency Table)		
	System	DVB-T/C, PAL , SECAM , NT4.43		
	Sound	PAL-B/G/I/D/K, Dolby Digital Plus/Pulse

2-2. Accessories

Product	Description	Code. No	Remark
	Remote Control & Batteries (AAA x 2)	AA59-00741A(EU/CIS)	Samsung Electronics Service center
		4301-000121	
	Power Cord	3903-000603(EU) 3903-000619(UK)	
	Owners Manual	BN68-04784A	
	Holder-Wire Stand	BN61-08370A	

3. Disassembly and Reassembly

This section of the service manual describes the disassembly and reassembly procedures for the LED TV.

WARNING

This LED TV contains electrostatically sensitive devices. Use caution when handling these components.

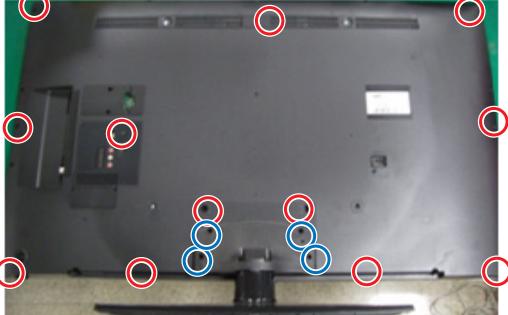

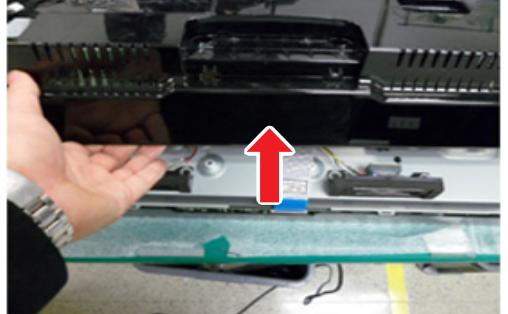

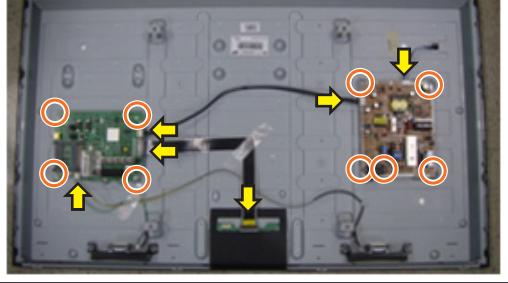

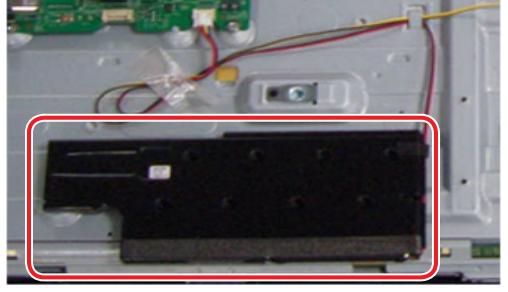

CAUTION

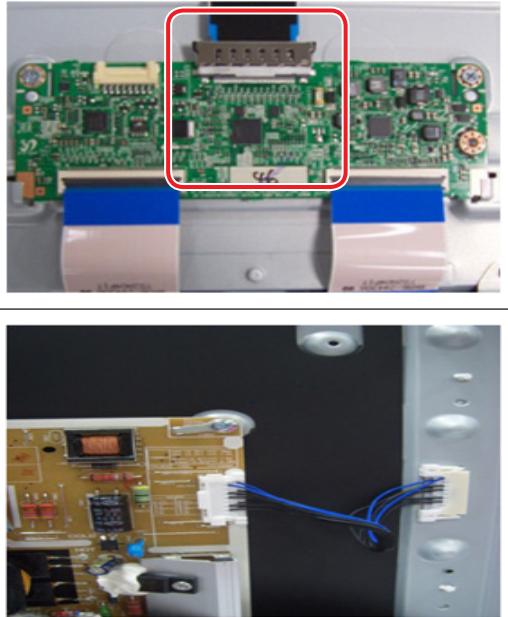

1. Disconnect the LED TV from the power source before disassembly.
2. Follow these directions carefully; never use metal instruments to pry apart the cabinet.
3. If there is no additional comment, it is same for all inches.

■ 5000

Description	Picture Description	Screws
1 Place TV face down on cushioned table.		
2 Remove 4 screws from the Stand.		 6003-001782
3 Remove Stand.		

3. Disassembly and Reassemble

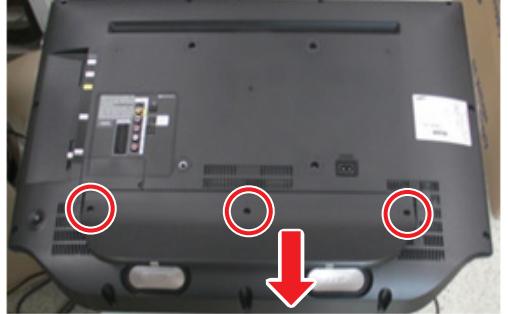

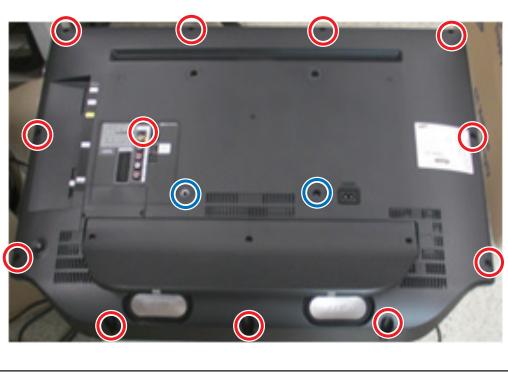

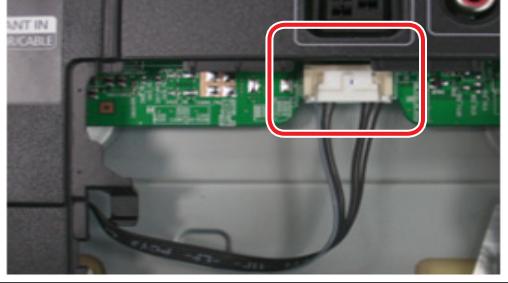

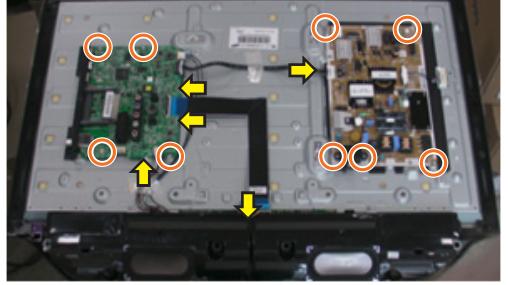

Description	Picture Description	Screws
4 Remove the screws of Rear-Cover.		 6003-001782  6003-002755
5 Remove the Rear-Cover.		
6 Remove the screws.		 6001-003016
7 Remove the Speakers and Power Cables.	  	

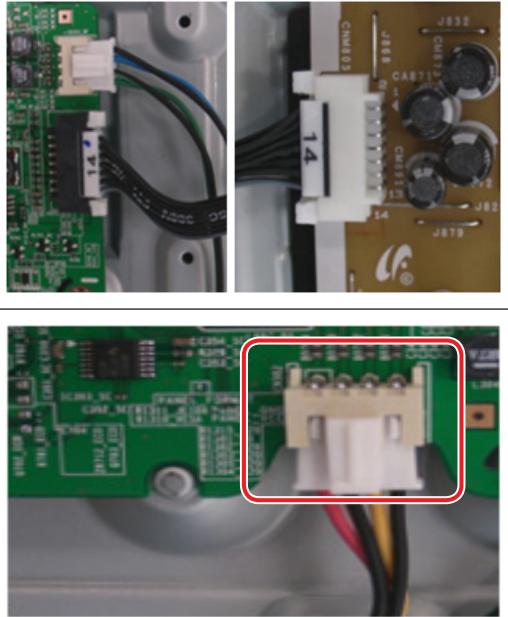

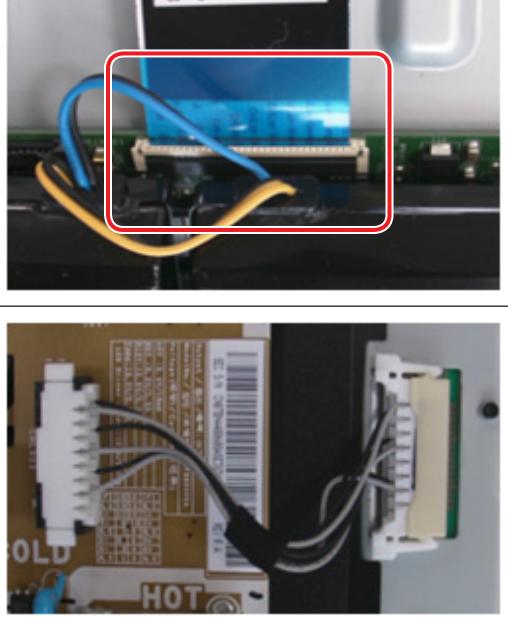

Description	Picture Description	Screws
8 Remove the LVDS Cable and Panel Drive Cable.		
9 Completed disassembly.		

■ 4800

Description	Picture Description	Screws
1 Place TV face down on cushioned table.		

3. Disassembly and Reassemble

Description	Picture Description	Screws
2 Remove 3 Screws from the Stand and Remove Stand.		 6003-001782
3 Remove 14 Screws of Rear-Cover.		 6003-001782  6003-002755
4 Remove the Cover Jack and Function Assy Cable.		
5 Remove the Rear Cover.		
6 Remove 9 Screws of Main Board and Power Board.		 6001-003016

Description	Picture Description	Screws
7 Remove the Speakers and Power Cables.		
8 Remove the LVDS Cable and Panel Drive Cable.		
9 Completed disassembly.		

Reassembly procedures are in the reverse order of disassembly procedures.

3. Disassembly and Reassemble

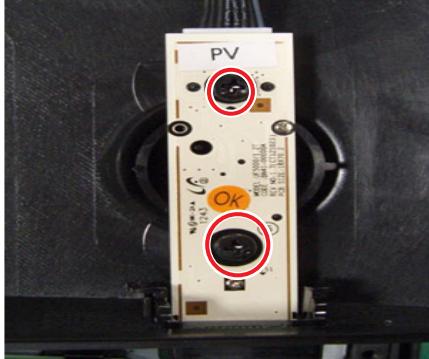

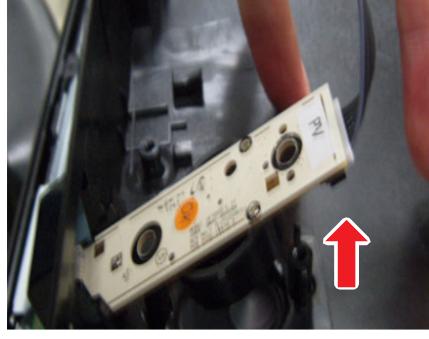

■ Screw Size

Code No.	COLOR	A (mm)	B (mm)	C (mm)
6003-001782	BLACK	7.80~8.30	11.20~12.00	3.81~3.91
6001-002755	BLACK	7.1~7.5	5.7~6.0	2.98~3.02
6001-003016	WHITE	7.1~7.5	4.7~5.0	2.92 ~ 2.98
6003-000115	BLACK	5.8~6.3	5.5~6.0	2.95~3.05

The diagram illustrates a screw with a flat head. Dimension A is the width of the head, measured across the top. Dimension B is the total length of the screw from the tip to the head. Dimension C is the thickness of the head, measured from the side.

3-2. Assy Board P-Jog Switch & Ir

■ How to disassembly

Description	Picture Description	Refer
1 Remove the screw.		
2 Remove the Function Assy.		

■ How to assembly

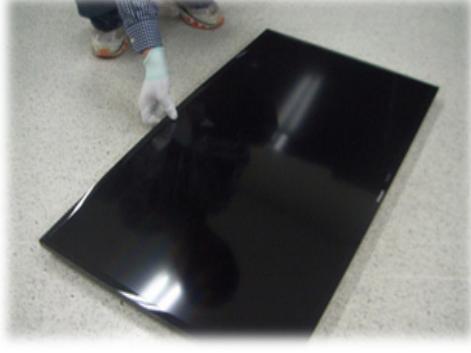

Description	Picture Description	Refer
1 Check the locking hole.		
2 Combine the function assy to locking hole.		

When you want to ignore the funtion key actions

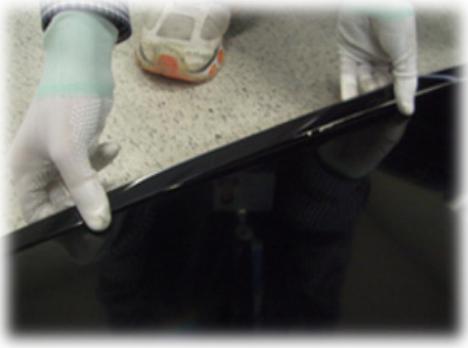

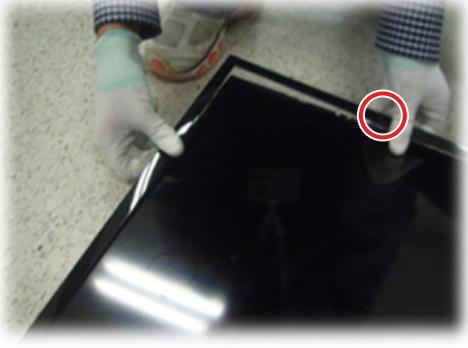

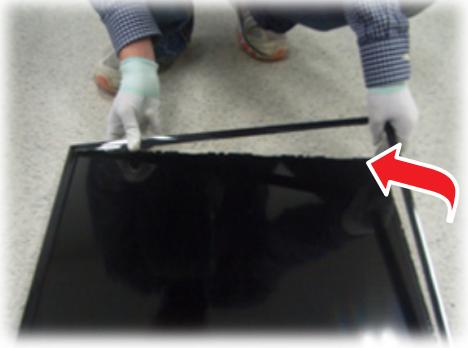

Option		
Control	Config Option	Navigation Key Func
Debug		0 : New Function (Naviagtion) Key [Default]
SVC		1 : Old Function (Touch) Key
ADC/WB		2 : Do not work Function key
Advanced		

3-3. Disassembly(PTC)

■ How to disassembly

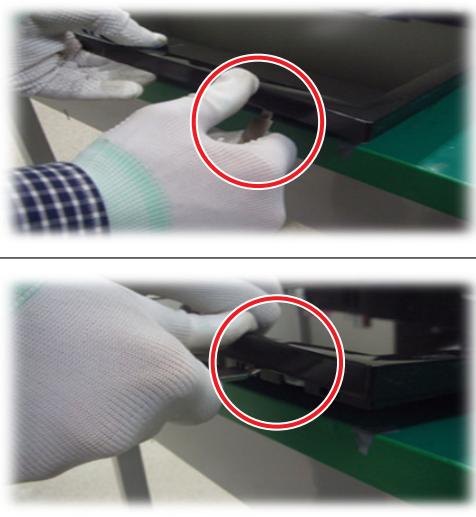

Description	Picture Description	Refer
1 Place TV face up on cushioned table.		
2 Products at the top of the central TOP-CHASSIS is rotated by 45 degrees outward and pulls.	 	

3. Disassembly and Reassemble

Description	Picture Description	Refer
3 Pull in the same way from the center of the top.	 	
4 Pull the left part of the product as shown while holding the raised portion on figure 3.		
5 Pull the bottom part of the product as figure 2 while holding the raised portion on figure 4.		

Description	Picture Description	Refer
<p>6 As shown in the picture, Lift the bottom of the TOP-CHASSIS.</p>	 	
<p>7 Pull the products at the bottom of the right side of the chassis.</p>	 	

3. Disassembly and Reassemble

Description	Picture Description	Refer
8 Lift the bottom of the chassis with one hand and holding the bottom of the product after you pull the right side of the product chassis.		
9 Disassembly is complete.		
! CAUTION To use JIG : Does not lift the chassis by hand, JIG using the lift.		

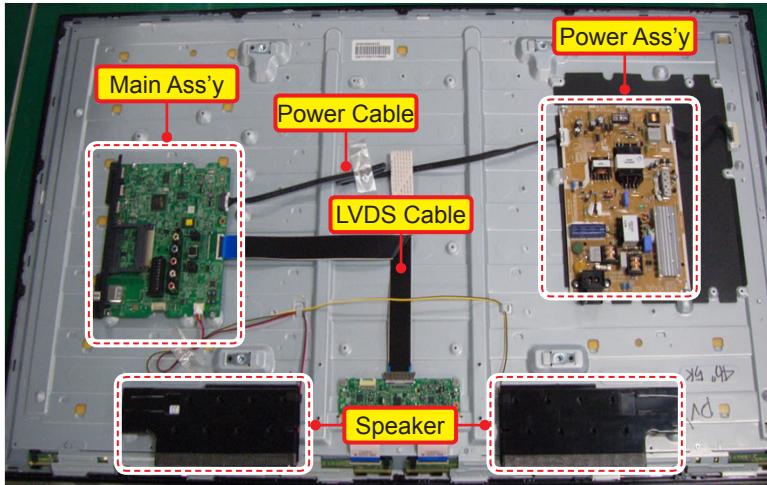

Reassembly procedures are in the reverse order of disassembly procedures.

4. Troubleshooting

4-1. Troubleshooting

■ Previous Check

1. Check the various cable connections first.
 - Check to see if there is a burnt or damaged cable.
 - Check to see if there is a disconnected or loose cable connection.
 - Check to see if the cables are connected according to the connection diagram.
2. Check the power input to the Main Board.

Main Board Assy (CN201)			
13	B13V	14	PWM_DIM
11	B13V	12	B13V
9	B13VS	10	SW_INV
7	B13VS	8	GND
5	GND	6	GND
3	B5.3V	4	A5.3V
1	B5.3V	2	SW_PW

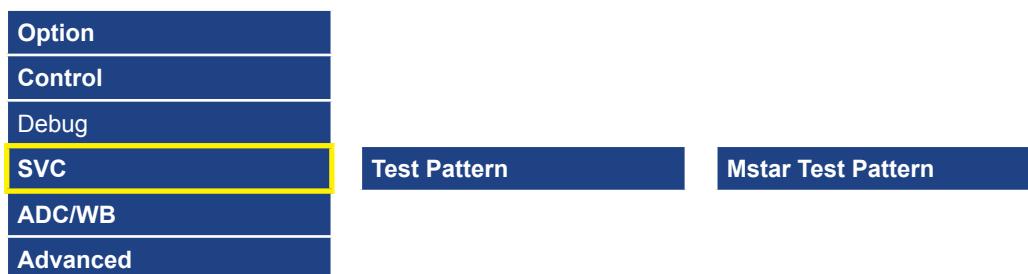

Power Board Assy (CNM803)			
14	B13V	13	B13V
12	B13V	11	B13V
10	SW_INV	9	B13VS
8	GND	7	B13VS
6	GND	5	GND
4	A5.3V	3	B5.3V
2	SW_PW	1	B5.3V

* Change the 14Pin to PWM_DIM(2013 years) from B13V(2012 years)

3. Check the power in & output between IP & Main Board, Main Board & Panel, IP & Panel.

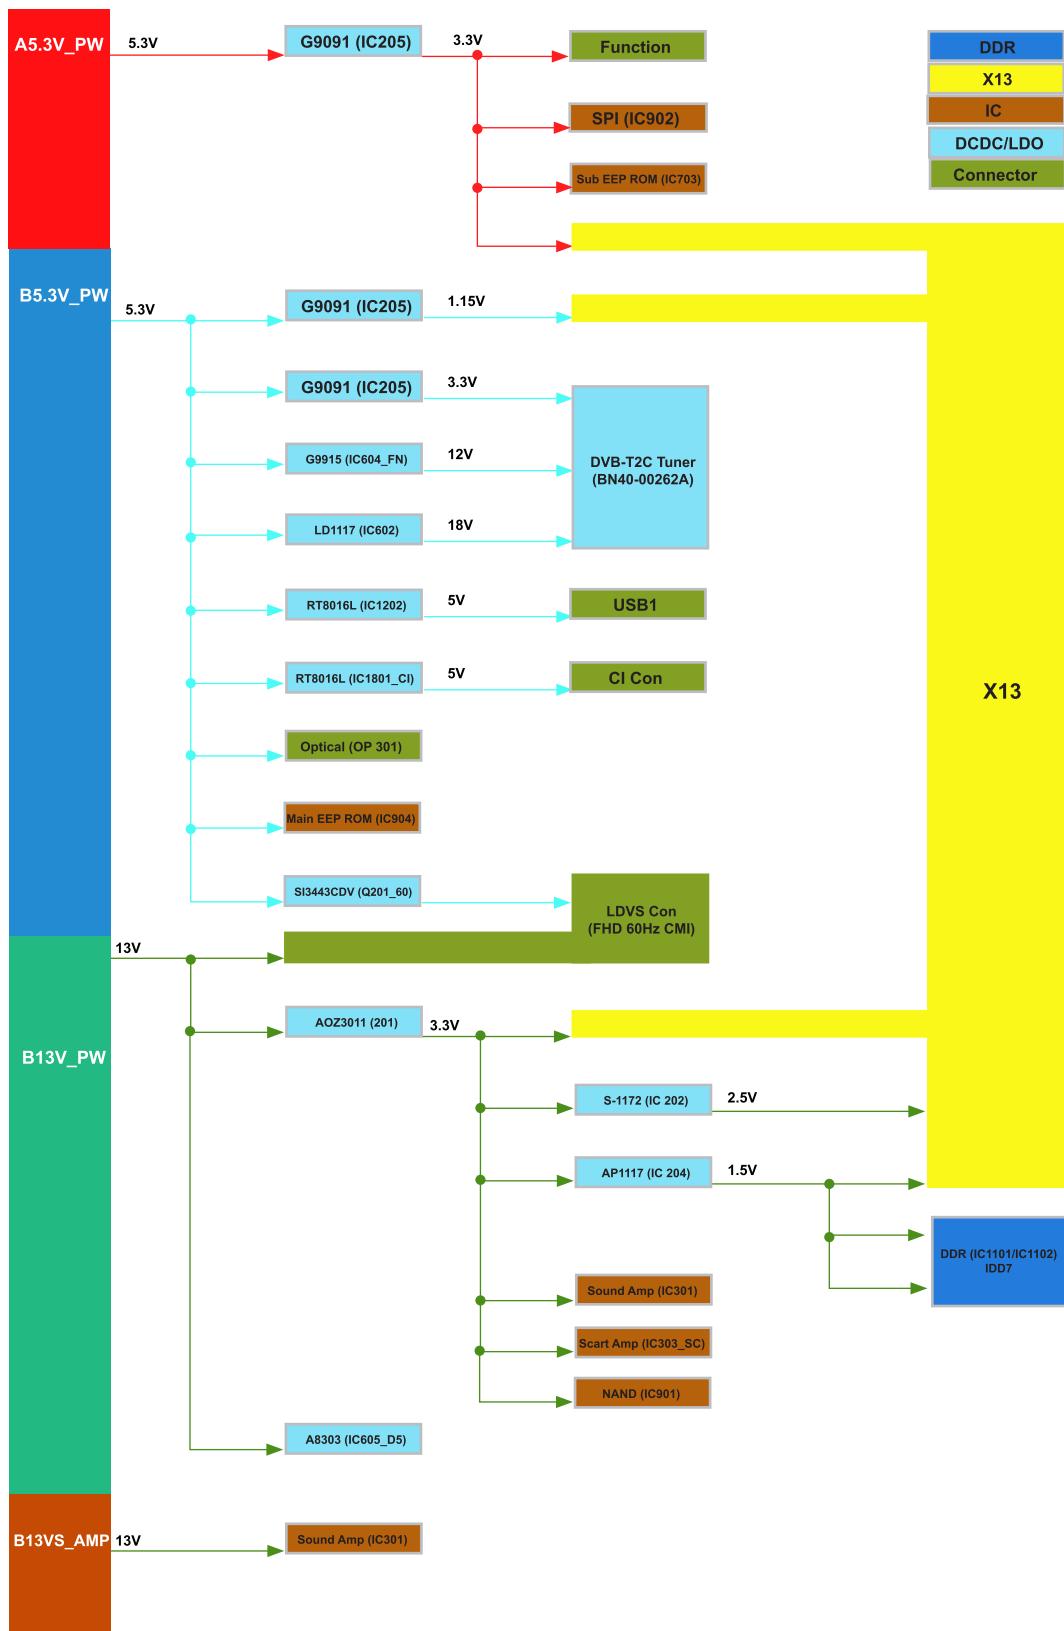

■ How to know it is from Main Board or T-Con when some problems happen

1. No Picture : Backlight is on, but there is no picture and LED indicator in front of TV is blinking.
 - Check the LVDS Cable connection. If still problems, change the T-Con Board and then Main Board step by step.
 2. Picture distortion : Enter the service mode ... Choose 'SVC' ... Check the 'internal pattern.'
 - Enter 'Service Mode.'
 - If you do not have Factory remote control
 - If you have Factory remote control
- Power OFF → Info → MENU → Mute → Power On
- INFO → Factory
3. Choose 'SVC.'
 4. Choose 'Test pattern.'
 5. Select the each pattern and then check all pattern is ok or not.

Pattern Status is	Change the	Test Pattern is made by the MSTAR IC
OK	Main Board	We guess front of MSTAR IC has problem.
NG	Panel and T-Con Board	We guess back of MSATR IC has problem.

■ Power-Tree

4-2. How to Check Fault Symptom

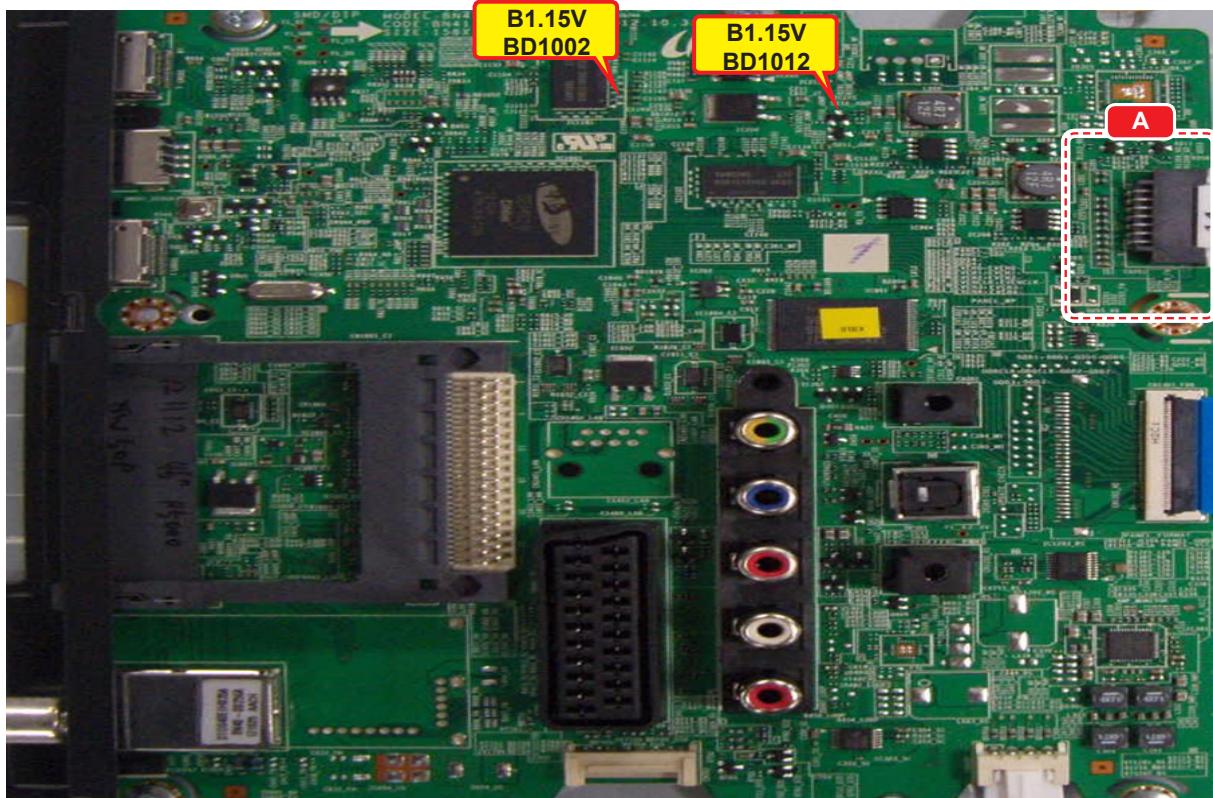

■ NO Power and No Video

Symptom	<ul style="list-style-type: none"> The LEDs on The front panel do not work when connecting The power cord. The SMPS relay does not work when connecting The power cord. The units appears to be dead.
Major checkpoints	<p>The IP relay or the LEDs on the front panel does not work when connecting the power cord if the cables are improperly connected or the Main Board or SMPS is not functioning. In this case, check the following:</p> <ul style="list-style-type: none"> Check the internal cable connection status inside the unit. Check the fuses of each part. Check the output voltage of SMPS. Replace the Main Board.
Diagnostics	<pre> graph TD A[Power cord on] -- Yes --> B[Check 'Stand-By A5.3V' 5.3V appear at BD210? 0V to 5.3V (CN201 #4)] B -- No --> C[Cause : There did not supply the power from SMPS. Measure : Change 14p power cable and SMPS.] B -- Yes --> D[Set On.] D -- Yes --> E[Check 'SW_POWER' more than 3.3V appear at CN201(#2) 0V to 3.3V↑ (CN201 #2)] E -- No --> F[Cause : Main IC(X13) did not control the SW_Power. Measure : Change the Main Assy.] E -- Yes --> G[Check 'Power input of Main Ass'y' ? 4-4. White Balance

4-4-1. Calibration

1. Into the Factory Mode.
2. Select SVC Menu.
3. Select ADC/WB menu.
4. Select ADC menu.

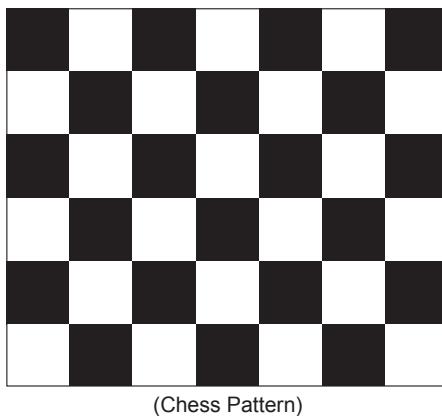

4-4-2. Service Adjustment

You must perform Calibration in the Lattice Pattern before adjusting the White Balance.

■ Color Calibration

- Adjust Specification

Source	Setting Mode	Pattern	Use Equipment
HDMI	1280 x 720@60 Hz	Pattern #24 (Chess Pattern)	CA210 & Master MSPG925 Generator

- Use other equipment only after comparing the result with that of the Master equipment.

Input mode	Calibration	Pattern
CVBS IN (Model_#1)	Perform in NTSC B&W Pattern #24	Lattice
Component IN (Model_#6)	Perform in 720p B&W Pattern #24	Lattice
PC Analog IN (Model_#21)	Perform in VESA XGA (1024x768) B&W Pattern #24	Lattice
HDMI IN	Perform in 720p B&W Pattern #24	Lattice

■ Method of Color Calibration (AV)

1. Apply the NTSC Lattice (N0. 3) pattern signal to the AV IN 1 port.
2. Press the Source key to switch to “AV1” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “AV Calibration” menu.
6. In “AV Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “AV Calibration” status from Failure to Success.

■ Method of Color Calibration (Component)

1. Apply the 720p Lattice (N0. 6) pattern signal to the Component IN 1 port.
2. Press the Source key to switch to “Component1” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “Comp Calibration” menu.
6. In “Comp Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “Comp Calibration” status from Failure to Success.

■ Method of Color Calibration (PC)

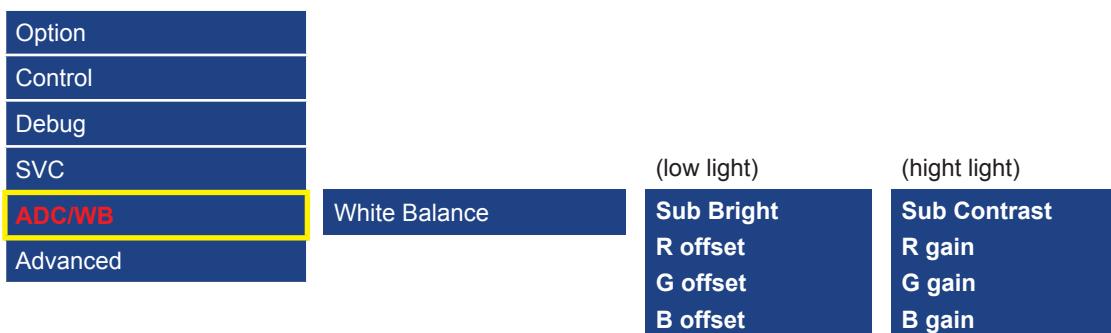

1. Apply the VESA XGA Lattice (N0. 21) pattern signal to the PC IN port.
2. Press the Source key to switch to “PC” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “PC Calibration” menu.
6. In “PC Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “PC Calibration” status from Failure to Success.

■ Method of Color Calibration (HDMI)

1. Apply the 720p Lattice (N0. 6) pattern signal to the HDMI1/DVI IN port.
2. Press the Source key to switch to “HDMI1” mode.
3. Enter Service mode.
4. Select the “ADC” menu.
5. Select the “HDMI Calibration” menu.
6. In “HDMI Calibration Off” status, press the “▶” key to perform Calibration.
7. When Calibration is complete, it returns to the high-level menu.
8. You can see the change of the “HDMI Calibration” status from Failure to Success.

4-4-3. Adjustment

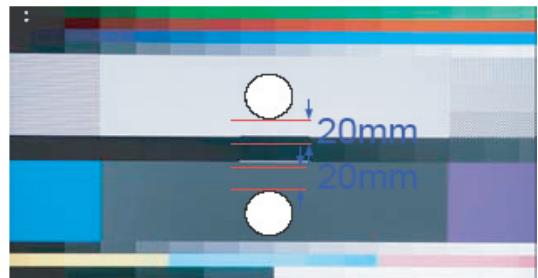

1. Into the Factory Mode.
2. Select **SVC** Menu.
3. Select **ADC/WB** menu.
4. Select **White Balance** menu.

4-5. White Ratio (Balance) Adjustment

1. You can adjust the white ratio in factory mode (1:Calibration, 3:White-Balance).
2. Since the adjustment value and the data value vary depending on the input source, you have to adjust these in CVBS, Component 1 and HDMI 1 modes.
3. The optimal values for each mode are configured by default. It varies with Panel's size and Specification.

- Equipment : CS-210
- Pattern: MIK K-7256 #92 "Flat W/B Pattern" as standard
- Altenate Equipmet : CA200& anyone Master supported pattern#92(refer to right photo)
- Use other Equipment only after comparing the result with that of the Master equipment.
- Set Aging time : 60 min

Calibration and Manual setting for WB adjustment

- HDMI : Calibration at #24 Chessboard Pattern Manual adjustment at #92 pattern (720p)
- COMP: Calibration at #24 Chessboard Pattern Manual adjustment at #92 pattern (720p)
- CVBS: Calibration at #24 Chessboard Pattern Manual adjustment at #92 pattern (NTSC)

Note

If finishing in HDMI mode, adjustment coordinate is almost same in AV/COMP mode.

White Balance Manual adjustment

4-6. Software Upgrade

Software Upgrade can be performed by downloading the latest firmware from samsung.com to a USB memory device.

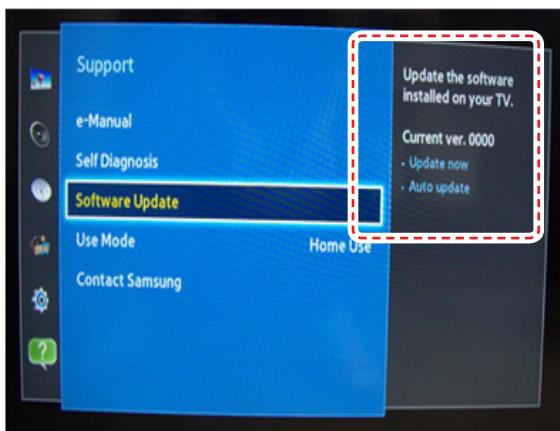

- Current Version - The software already installed in the TV.

Software is represented as 'Year/Month/Day_Version'.

4-6-1. How to Check the Software Version

■ Use the Main Menu

1. Click the "MENU" key in remote controller.
2. Select "Support" menu.
3. Locate the menu cursor "Software Upgrade" menu.
4. Click the "INFO" key.
 - Check the Main SW and Micom version.

■ Use the Factory Mode

Option	T-MST13DEUC-xxxx T-MST13DEUS-xxxx E-Manual : X13DVBEU*F-xxxx EDID SUCCESS CALIB : AV/COMP/PC/HDMI/ Option : 32R6AF60S,EU,5000,NONE USB RS232C : OFF

4-6-2. How to Upgrade Software and Micom

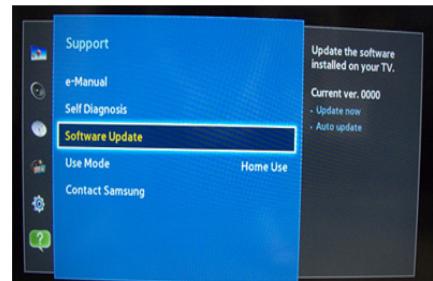

Insert a USB drive containing the firmware upgrade downloaded from samsung.com into the TV. Please be careful not to disconnect the power or remove the USB drive while upgrades are being applied. The TV will turn off and turn on automatically after completing the firmware upgrade. Please check the firmware version after the upgrades are complete (the new version will have a higher number than the older version). When software is upgraded, video and audio settings you have made will return to their default (factory) settings. We recommend you write down your settings before beginning firmware update. After update is completed, restore your previous settings.

■ Main Software Upgrade

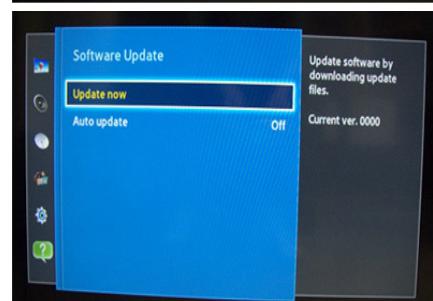

1. Store the sw program named "T-MST13DEUC" in USB memory stick
 - Connect the USB.

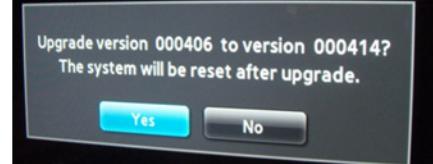

2. Click the "MENU" key in Remote Controller.
3. Select "Support" menu.
Locate the menu cursor "Software Upgrade" menu.

4. Locate the menu cursor "Update now" menu.

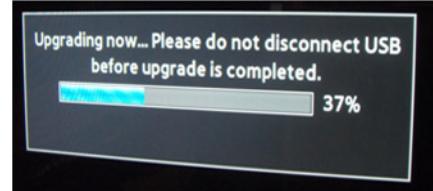

5. Click the "ENTER" key.

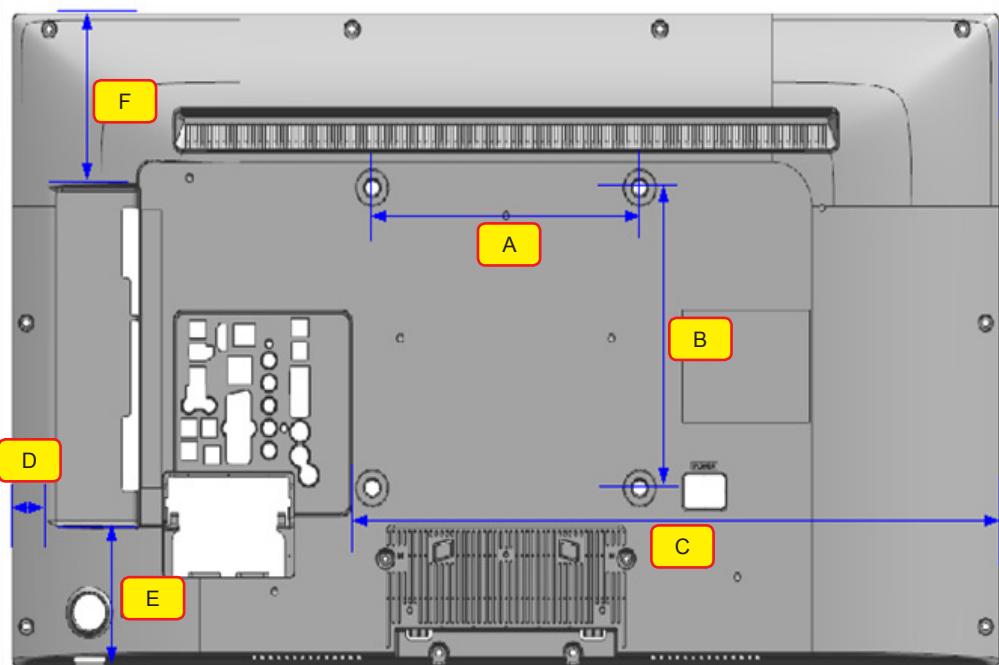

6. Click the "ENTER" key.

- Wait for upgrade complete.
- Check the Software Version.

34	GND	68	GND

5-3. Connector Functions

■ U85B_FHD

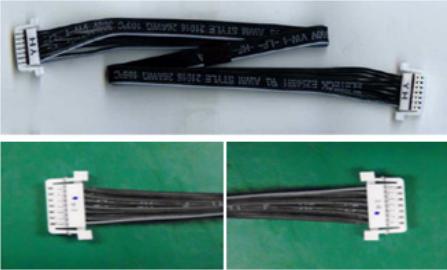

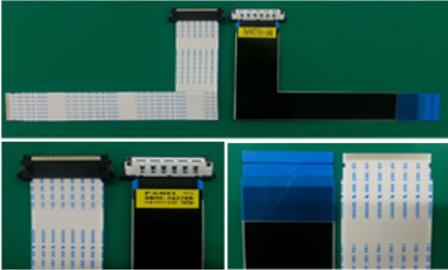

Connector	Function
CN201 ↔ IP CN	Supply main power and dimming signal from IP board to Main Board.
CN1301_FHD ↔ T-CON CNF1	The LVDS signal transferred from Main Board to Panel.

■ U85B_U85C_HD

Connector	Function
CN201 ↔ IP CN	Supply main power and dimming signal from IP board to Main Board.
CN1302_HD ↔ T-CON CNF1	The LVDS signal transferred from Main Board to Panel.

5-4. Cables

■ 5000

Use	LEAD (Main-IP 14P)	LVDS CALBE (Main - Panel 51P)
